SOURCE EVALUATIONS ARE DEFINITIVE. APPRAISAL OF CONTENT IS TENTATIVE.

25X1

1. In Constanta harbor the surface of the north quay in the inner basin contiguous with berths 13 and 14 is being relaid. The original surface is being replaced with stone blocks laid on a foundation of reinforced concrete, the concrete lying on a substructure of gravel. Tracks have also been laid for electrically operated mobile cranes on the new surface. Six new cranes are already in position on these tracks and two of them are functioning. These cranes are equipped with folding booms. The two cranes which stood in this area before have been removed.
2. The three small warehouses opposite berth 15 have been pulled down and have been replaced by a single large reinforced concrete warehouse. This consists of a basement, not yet completed, and a ground floor which is in use.
3. The work is being carried out by the Rumanian Army labor battalions.
